SILVER JACKETS

Many Agencies One Solution

Educational Outreach with Nebraska Floodplain and Stormwater Managers Association (NeFSMA)

Partners: USACE, NeFSMA, NDNR, NEMA, FEMA, EPA, PMRNRD, UNL Extension, etc

(2015 Climate Change Workshop)

ACTIVITIES

2013 Levee Safety Outreach – Provided tools to assess and mitigate the risks associated with levees.

2014 Nonstructural Outreach – Provided information about the benefits of nonstructural flood risk reduction.

2015 Climate Change Outreach– Provided information about the effects and impacts climate change will have on local floodplains and stormwater management systems.

2016 Dam Safety Outreach – Will provide information about dam safety and the potential risks of improper dam maintenance.

LOCATION AND DESCRIPTION:

Educational outreach programs focus on providing local floodplain managers and stormwater officials with information and tools to help them ensure the safety of their communities. Outreach programs are held in various places in the State of Nebraska in association with the annual NeFSMA Conference.

PROBLEM AND NEED: There are many different sources of information available to floodplain managers and stormwater officials which can make disseminating and understanding that information difficult. By providing free, professional educational opportunities, Nebraska Silver Jackets provides clear information and useful tools from multiple agencies in a collaborative cost effective format.
